

THE MISSION

BLUEDU provides VET teachers with the tools necessary to comprehend, study and finally understand blockchain technology. This is necessary as we live in a world that has implemented this technology practically in all areas and therefore tomorrow's workers will need to have extensive knowledge of this technology.

THE RESULTS

1. A teaching outline which constitutes the baseline for the teaching materials.
2. An interactive e-book on blockchain technologies including subject areas in various topics for VET educators.

THE PARTNERS

The partners behind the project have significant knowledge of the challenges and problems related to internet technologies and related cutting-edge technologies, terms in blockchain, blockchain technology, blockchain technology in education, and recommendations for the use of blockchain technology.
