

# The BLUEDU Training Outline is now published

The **BLUEDU Training Outline** allows to find out the topics and knowledge **VET teachers** need to have on **blockchain technology**, to be able to teach the topic to their students.

It is the baseline for the development of the **interactive e-Book** and thus support the main objective of the project, i.e. to provide **VET teachers** with the tools necessary to comprehend, study and finally understand **blockchain technology**.

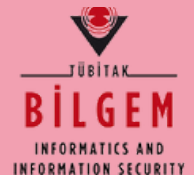

The **BLUEDU training** consists of 3 following knowledge blocks, each divided into smaller size-bite units.

- **Blockchain Technology** – Introduces the topic of blockchain and its different application domains.
- **Teaching Approaches for Blockchain Education** – Focusses on introducing the different teaching approaches considered most appropriate for teaching the topic of blockchain top VET students.
- **Teaching and Evaluation Methods and Tools for Blockchain Education** – Addresses the different approach and methods for the evaluation of the acquirement of blockchain skill by VET students.

The full set of materials will be available through the interactive e-Book, so stay tuned for its publication on our website: <https://bluedu.eu/>

And follow us on our social media so we will be notified when it is available: **BLUEDU**
